

Nail Workshops

Workshops are designed for those persons wishing to do a training course but due to time and financial constraints are unable to complete a professional course over a duration of a few days.

A workshop offers the beginner a professional efficient overview of the product, theoretical knowledge & practical application of the required system to create a beautiful set of artificial nail extensions!

The PNB Accredited Educator will ensure that time is devoted to the individual to assist the student to ensure that they understand and obtain confidence in the application technique of the required nail system.

The following will be covered in a workshop:

- Basic anatomy & theory
- Product Knowledge
- Application
- Practical techniques required for successful application
- Finishings
- Aftercare

Once the workshop has been completed a certificate of attendance will be issued.

Please note that a workshop is not a replacement for a complete professional training course.
